Font display — Est savings of 100 ms

Consider setting font-display to swap or optional to ensure text is consistently visible. swap can be further optimized to mitigate layout shifts with font metric overrides. FCP Unscored

Forced reflow

A forced reflow occurs when JavaScript queries geometric properties (such as offsetWidth) after styles have been invalidated by a change to the DOM state. This can result in poor performance. Learn more about forced reflows and possible mitigations. Unscored

Preconnected origins

preconnect hints help the browser establish a connection earlier in the page load, saving time when the first request for that origin is made. The following are the origins that the page preconnected to.

no origins were preconnected

Preconnect candidates

Add preconnect hints to your most important origins, but try to use no more than 4.

No additional origins are good candidates for preconnecting

Use efficient cache lifetimes — Est savings of 3 KiB

A long cache lifetime can speed up repeat visits to your page. Learn more about caching. LCP FCP Unscored

Request	Cache TTL	Transfer Size
Google Maps Utility		**3 KiB**
...api/js?key=... (maps.googleapis.com)	30m	3 KiB

Render blocking requests

Requests are blocking the page's initial render, which may delay LCP. Deferring or inlining can move these network requests out of the critical path. LCP FCP Unscored

URL	Transfer Size	Duration
insureitgroup.net 1st Party	**21.3 KiB**	**830 ms**

Legacy JavaScript — Est savings of 11 KiB

Polyfills and transforms enable older browsers to use new JavaScript features. However, many aren't necessary for modern browsers. Consider modifying your JavaScript build process to not transpile

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

CONTRAST

- Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.

BEST PRACTICES

- Touch targets do not have sufficient size or spacing.
- Identical links have the same purpose.

These items highlight common accessibility best practices.
